A positive dental experience in a comfortable, health-conscious environment

Coronavirus Update

As we informed you several days ago, Dr. Liscio and Dr. Maier have been monitoring the rapidly changing COVID-19 pandemic. We have been following the recommendations from the Vermont Department of Health, the CDC and the Vermont State Dental Society in order to keep our patients, our staff, our families and ourselves safe and protected. Today, the Vermont State Dental Society has "strongly recommended" that all dentists practicing in Vermont voluntarily suspend non-urgent dental care for the next two weeks, and then reevaluate at that time the appropriate action. Along with this recommendation, and with all Vermont schools closing during this time as well, we have decided to also close Liscio Dental beginning today, 3/16/2020, and hope to reopen on 3/31/2020, but in the meantime, we will be monitoring this situation very closely day by day. If you have any appointments during this time, we will be in touch to reschedule. We will be available to our *current patients of record only* for *true dental emergencies* during this time. You may reach the Dr. at (802)272-1519 if you have any bleeding, pain or swelling.

We value your trust and loyalty as patients and will do our best to keep a sense of balance between our responsibility to care for our patients and also to keep everyone we hold dear, as safe as possible. Please stay safe and protect yourself by following the guidelines set forth by the CDC guidelines; we look forward to seeing you all after this uncertain time is over and we begin again the normalcy of life.

In Health,

The Drs. and Staff at Liscio Dental
